

# WIZARD 520

Maintaining sleep-disorder breathing therapy efficacy all night - Improving experience and outcome for open-mouth sleepers

Be well, Live well

**Wellell**

# WiZARD 520

## Comfortable at every direction

Hospitalization causes more than half of VTE cases and excess length of stay and mortality. 24% is directly related to post-acute complications, requiring up to 10.5 days of in-hospital treatment.

The institutional cost per inpatient DVT event (6-month treatment involving acute care, laboratory, pharmacy, diagnostic, physician fees, hospitalization, and contiguous skilled facility care) ranges from USD 3,906 to over USD 17,168, and an additional USD 264 minimum in hospital costs per day, depending on the severity and patient's health status and age. 26% readmits within 30-days due to VTE-related complications such as bleeding and post-thrombotic syndrome (PTS), which can increase costs by 48%.

Improving inpatient DVT management with automated, portable, comfortable, and intuitive compression therapy reduces the economic burden and readmissions within the first 6 to 12 months and upwards to 10 years after initial diagnosis.

Elastic headgear gives users the freedom to complete therapy sessions without interrupting their daily routines.

Flexible tubing and low noise allow users a distraction-less environment to comfortably reposition and drift into sleep.

Elaborately designed with the skin-friendly soft fabric side frame instead of a plastic frame to maintain stability as well as offer the upmost comfort feeling to users as it can prevent leaving red marks on the face

**Intuitive Installation - Only One Step is Needed**

The 3D-shaped headgear is secured with robust, non-magnetic clips and can be simply detached by 45° turn on the buckle with just one hand

**Greater Convenience Achieved**

Offers better flexibility for freedom of movement during sleep

**Sleep Freely in Any Direction**

360° Swivel Elbow allows users to sleep freely in any direction without obstruction from the tube

**Greater Convenience Achieved**

Offers better flexibility for freedom of movement during sleep

**Quick Release Tubing**

An easy one step removal design for convenient tubing connection

**Headgear Clip**

One buckle operation for simple mask fitting

Ergonomic fitted cushion over the nose and mouth maintains a comfortable humidity level all night long for better sleep quality.

Compact size, simple assembly, and effortless storage make it easy to travel with and maintain on the road.
